Natural wood Made to last

Headquartered in Norway, Kebony is a leading technology company known for its sustainable alternative to hardwood, helping reduce CO₂ emissions globally. Through its patented modification processes (dually modified™), Kebony transforms softwoods like pine into durable timber for various outdoor applications in over 100 countries.

Recent investments in 2021 and recognition as a Financial Times Tech Champion in 2023 highlight Kebony's growth and innovation in delivering sustainable solutions. Check out the Kebony Sustainability Report 2023 for more details.
