NATURAL WOOD VENEER & VARNISH SHADES

AFRO-TEAK

techn@wood
DESIGN ARCHITECTURE SYSTEMS

AFRORMOSIA TEAK (Pericopsis elata)

NATURAL COLOUR: Heartwood is typically a yellowish brown, occasion will have an either reddish or olive hue. Color tends to darken with age. Narrow sapwood is pale yellow and is clearly differentiated from the heartwood. Since **TECHNOWOOD** uses natural wood veneer, colors may have various shades.

TEXTURE: Grain is usually straight, though it can also be interlocked. With a fine uniform texture and good natural luster.

PLACE OF USE: TEAK is recommended for both interior and exterior use. For varnish options please check the next page. (Custom varnish types can be provided)

- Varnish colours displayed on this page are indicative but not conclusive. It may be displayed divergently on the screen due to RGB calibration.
- All of the recommended maintenance cycles above are for the vertical applications (facade, sun shaders, etc.), horizontal applications (rooftops, canopy, etc.) may require 2 times quicker maintenance cycle than the vertical applications.

MAHOGANY

techn@wood
DESIGN ARCHITECTURE SYSTEMS

MAHOGANY (Myroxylon balsamum)

NATURAL COLOUR: There is a fair degree of color variation between boards of Mahogany, ranging from a lighter golden brown to a darker purplish red or burgundy. The color tends to turn more red/purple with age. Quartersawn sections can show a striped or ribbon pattern.

Since TECHNWOOD uses natural wood veneer, colors may have various shades.

TEXTURE: Grain is usually interlocked, with a medium to fine texture. Good natural luster.

PLACE OF USE: MAHOGANY is recommended for both interior and exterior use. For varnish options please check the next page. (Custom varnish types can be provided)

The background of the entire page is a close-up photograph of a walnut wood surface, showing its characteristic vertical grain and warm, brownish tones. The texture is smooth but shows natural wood grain variations.

WALNUT

techn@wood
DESIGN ARCHITECTURE SYSTEMS

WALNUT (Juglans)

NATURAL COLOUR: Heartwood can range from a lighter pale brown to a dark chocolate brown with darker brown streaks. Color can sometimes have a grey, purple, or reddish cast. Sapwood is pale yellow-gray to nearly white. Figured grain patterns such as curl, crotch, and burl are also seen.
Since TECHNOWOOD uses natural wood veneer, colors may

TEXTURE: Grain is usually straight, but can be irregular. Has a medium texture and moderate natural luster.

PLACE OF USE: WALNUT is recommended for interior use. Although it can be selected for exterior use, but only on the areas where it will not face direct sunlight, (such as soffit, etc.)
For varnish options please check the next page. (Custom varnish types can be provided)

OAK

techn@wood
DESIGN ARCHITECTURE SYSTEMS

OAK (Quercus alba)

NATURAL COLOUR: Heartwood is a light to medium brown, commonly with an olive cast. Nearly white to light brown sapwood is not always sharply demarcated from the heartwood. Quartersawn sections display prominent ray fleck patterns. Conversely, Red Oak tends to be slightly redder, but is by no means a reliable method of determining the type of oak. It may turn into dark yellowish colour by the time. Since **TECHNOWOOD** uses natural wood veneer, colors may have various shades.

TEXTURE: Grain is straight, with a coarse, uneven texture.

PLACE OF USE: OAK is recommended for interior use. Although it can be selected for exterior use, but only on the areas where it will not face direct sunlight, (such as soffit, etc.)
For varnish options please check the next page. (Custom varnish types can be provided)

ASH

techno**wood**
DESIGN ARCHITECTURE SYSTEMS

ASH (*Fraxinus latifolia*)

NATURAL COLOUR: The heartwood is a light to medium brown color. Sapwood can be very wide, and tends to be a beige or light brown; not always clearly or sharply demarcated from heartwood. **Since TECHNWOOD uses natural wood veneer, colors may have various shades.**

TEXTURE: Has a medium to coarse texture similar to oak. The grain is almost always straight and regular, though sometimes curly or figured boards can be found.

PLACE OF USE: ASH is recommended for interior use. Although it can be selected for exterior use, but only on the areas where it will not face direct sunlight, (such as soffit, etc.)
For varnish options please check the next page. (Custom varnish types can be provided)

BAMBOO

techno@wood
DESIGN ARCHITECTURE SYSTEMS

BAMBOO (Bambusa genera)

NATURAL COLOUR: Generally a uniform and pale yellow to almost white. Live bamboo that has been left standing too long frequently develops fungal decay, discoloring the wood with brown or black streaks and patches. Since **TECHNOWOOD** uses natural wood veneer, colors may have various shades.

TEXTURE: Being a monocot in the grass family, bamboo does not have any sapwood/heartwood or growth rings. Texture is very uniform, and ranges from medium to fine depending on density. Bamboo that has been split and processed into lumber will have intermittent variations in the fiber at each node on the stem.

PLACE OF USE: BAMBOO is recommended for interior use. Although it can be selected for exterior use, but only on the areas where it will not face direct sunlight, (such as soffit, etc.)
For varnish options please check the next page. (Custom varnish types can be provided)
